

Boston Mantra® Patient Advocacy Services Disclaimer

Boston Mantra provides strategic consulting services that may include patient advocacy support for high-net-worth individuals and families. These services are offered solely as part of broader planning engagements and are intended to assist with care navigation, health-related coordination, and strategic decision-making in connection with financial, legal, or estate matters.

We do not provide medical care, diagnosis, treatment, or clinical services. Patient advocacy support is non-clinical and consultative in nature and is not a substitute for licensed healthcare providers or professional medical advice. Boston Mantra is not a fiduciary, trustee, or legal representative in any healthcare or financial capacity unless explicitly stated in a written agreement.

All services are limited to what is permissible by law and are provided only under the scope of a written consulting agreement. No client relationship is established without formal documentation. Information shared through our platforms or communications is intended for general education and strategic planning purposes only, and should not be relied upon as medical, legal, or investment advice.

Boston Mantra disclaims any liability for outcomes related to medical decisions, financial transactions, or third-party content referenced or linked. We operate under the laws of the Commonwealth of Massachusetts, and all engagements are subject to applicable regulatory and legal boundaries.
